# ABOUT ICON

In 1999, Icon introduced the world to art-printed leather shoes with the release of its Andy Warhol Campbell Soup Sneaker. Since then, Icon has proved a leader in designing and manufacturing luxurious, high-quality, high-fashion shoes, handbags, and accessories. It is our goal to create leather goods that make our customers feel fashionable and comfortable and bring art to the world in an innovative way.

With a keen eye to trending colors and textures, our talented designers and graphic artists skillfully select and reproduce classic and contemporary artwork onto our leather products. They are exacting in their attention to detail, ensuring that the images are sized and positioned to complement each product type, while maintaining the integrity of the artwork they interpret. Our patented printing process transfers the exclusive, licensed artwork onto high-quality leather.

We work closely with up-and-coming artists and their representatives, supporting them through royalties paid from every purchase of their product. We also honor classic artists, such as Klimt, Monet, Toulouse-Lautrec, and Van Gogh.

Icon products can be found at select boutiques and department stores in the U.S. and Canada, as well as on our website, [www.iconshoes.com](http://www.iconshoes.com). For more information, please review our website or email customer service at [info@iconshoes.com](mailto:info@iconshoes.com)
